D N Polytechnic (DNP) is a grassroots-level non-governmental organisation (NGO) registered under the Bombay Public Trust Act, 1950. With a single-minded focus on vocational interventions, the polytechnic primarily aims at increasing people's income-earning or generating abilities. Over the past 40 years, we have helped thousands of economically-underprivileged individuals attain better livelihood, by skilling them, and thus lead a life of dignity and financial inclusion.

VISION

To enable youth, especially women from marginalised sections of the society, lead a socially and economically-empowered life

MISSION

Our mission is to alleviate poverty and social exclusion, and by doing so empower every individual, irrespective of his/her social status, gender, creed or education. All our endeavours are directed towards enabling the economically and socially-deprived sections of the society have a future of their choice. We identify and work with such people and provide them with an opportunity to enhance their income-earning capabilities and, therefore, lead a life of equality, inclusion and dignity.

Since inception, we have been involved in conducting various training, development and awareness programmes, focused especially on the weaker sections of the society.

45,000
Beneficiaries

1,500
Batches

8
Centres

FOCUS AREAS

LIVELIHOOD AND SKILL DEVELOPMENT

A strategic framework for technical skill development, focused on early-school dropouts and existing workers, especially in the unorganized/semi-organised sectors

WOMEN EMPOWERMENT

We focus on women-centric programmes because women are the most affected victims of poverty, abuse and discrimination, both socially and economically. Our programmes are aimed at their economic empowerment, thus leading to enhanced self-esteem and realisation of personal aspirations.

HEALTH AND ENVIRONMENT AWARENESS

Good health and clean environment is essential for a decent living standard which, irrespective of age, gender and socio-economic background, everyone deserves. Hence, we partner with several agencies to conduct various health and environmental awareness programmes throughout the year.

SKILL ASSESSMENT

We have been empaneled as an Assessing Body in six states. Under this, we are involved in testing skills of trainees. The assessment is done at other NGOs and training centres to ensure impartiality. We also provide certification that is valid both nationally and internationally.

JOIN HANDS WITH US

We are seeking partnerships from corporate sector to help tap the potential of millions of marginalised, young women and men, thus giving them an opportunity of enhancing their socio-economic status and enabling them to lead a life of inclusion and dignity.

Engage with us through

- ✔️ CSR partnerships
- ✔️ Supporting our training programmes
- ✔️ Volunteering at a centre
